

# Three Wise Kangaroos

## Video - answer key

1. It involves inserting a small microchip the size of a grain of rice into your hand.
2. The technology in place allows the users to enter the building and interact with all the machines within the office so there is no need for pass codes.
3. Their wider idea is to test this technology for its pros and cons before it becomes widely used by e.g. the tax office or big corporations so when you know how it works, you know what to expect and what to watch out for in the future.
